

RestorationManager™

Desktop and Mobile Job Management Tools

Increase your profits through better job management

Restoration manager is the essential job management tool for anyone working in property restoration. It's rich with custom system settings, a control dashboard, task management, and document and signature capture.

Job management

Never lose track of any aspect of your restoration job with tools to keep everything on track and up to date.

- Track images, documents and correspondence
- Create tasks and follow-up reminders
- Automate emails to your customers with data specific to their job
- Create detailed work plans

Job costing

Get accurate, detailed views of expenses throughout each job to stay on budget.

- Track detailed costs by job
- View estimate vs budget vs actual
- Calculate line item budgets automatically
- Integrate with QuickBooks, QuickBooks Online, Sage 50, Sage 100 Contractor, Sage 300 and more.

Equipment management

Reduce losses resulting from misplaced, overdue, and unmaintained equipment.

- Track equipment costs by job
- Barcode and scan equipment on jobs
- Reminders of equipment overdue and due dates
- Receive alerts for maintenance

Reporting

Gain insights for honing your operation and produce relevant reports for customers, insurers, and other interested parties.

- More than 120 built-in reports
- Set up reports to be emailed to you on a schedule you determine
- Memorize your favorite reports for easy access

Mobile-ready for the field

Restoration Manager is a powerful tool for your field personnel that allows for better communication with customers and trades and enhances overall customer satisfaction – in the field and on the go. Available for Apple and Android mobile devices.

- Capture signatures
- Create jobs and add work orders
- Check in and check out equipment
- Add job notes and images
- Update job claim status
- View and update information by prospect or customer

Dashboard insights for better decisions

How many jobs do I have in production? Who has referred me the most jobs this year? When is my equipment due back? What is my most profitable job type?

The Restoration Manager dashboard answers all of these with a quick glance.

Use the intuitive dashboard to examine:

- Report performance per office or by division
- Job progress summaries
- Project manager performance
- Estimator performance
- Profit and loss analysis
- Equipment summaries
- And more
